

# KS4 Geography – Year 10

	Topics Covered	Common Assessed Pieces (CAPS)
<p><b>YEAR 10 AUTUMN TERM</b></p> <p>Weeks – 1- 15</p> <p>5 Sept – 21 Dec 2018</p>	<p><b>THE CHALLENGE OF NATURAL HAZARDS</b></p> <p><b>3.1.1.1. Natural hazards</b> – Natural hazards pose major risks to people and property</p> <p><b>3.1.1.2 Tectonic hazards</b> – Earthquakes and volcanic eruptions are the result of physical processes. The effects of and responses to tectonic hazards vary between areas of contrasting levels of wealth. Management can reduce the effects of tectonic hazards.</p> <p><b>3.1.1.3 Tropical storms</b> – Tropical storms develop as a result of particular physical conditions. Tropical storms have significant effects on people and the environment.</p> <p><b>3.1.1.4 Extreme weather in the UK</b> – The UK is affected by a number of weather hazards. Extreme weather events in the UK have impacts on human activity.</p> <p><b>3.1.1.5 Climate change</b> – Climate change is the result of natural and human factors. Managing climate change involves both mitigation (reducing causes) and adaptation (responding to change).</p> <p><b>URBAN ISSUES AND CHALLENGES</b></p> <ul style="list-style-type: none"> <li>- A growing percentage of the world’s population live in urban areas</li> <li>- Urban growth creates opportunities and challenges for cities in LICs and NEEs.</li> <li>- Urban change in cities in the UK leads to a variety of social, economic and environmental opportunities and challenges.</li> <li>- Urban sustainability requires management of resources and transport.</li> </ul>	<p>Before half term: Map skills describe the distribution question based on the location of earthquakes and volcanoes.</p> <p>After half term: Global atmospheric circulation and climate change assessment paper</p>
<p><b>YEAR 10 SPRING TERM</b></p> <p>Weeks –16-27</p>	<p><b>PHYSICAL LANDSCAPES IN THE UK</b></p> <p><b>3.1.2.1 UK physical landscapes</b> - The UK’s relief covers a range of diverse landscapes.</p>	<p>Before half term: Graph/mapping skills assessment based on urban population.</p>

<p><b>7 Jan - 5 April 2019</b></p>	<p><b>3.3.2 Section B FIELDWORK</b> – destination tbc. Investigation will be carried out and written up to support the paper 3 exam – ‘Geographical applications’.</p> <p><b>3.1.2.2 Coastal landscapes in the UK</b> – The coast is shaped by a number of physical processes. Distinctive coastal landforms are the result of rock type, structure and physical processes. Different management strategies can be used to protect coastlines from the effects of physical processes.</p> <p><b>3.1.3.3 River landscapes in the UK</b> – The shape of river valleys change as rivers flow downstream. Distinctive fluvial landforms result from different physical processes. Different management strategies can be used to protect river landscapes from the effects of flooding.</p>	<p>After half term: Extended (SPaG marked) 12 mark question on urban sustainability.</p>
<p><b>YEAR 10 SUMMER TERM</b></p> <p><b>Weeks – 28- 39</b></p> <p><b>23 April- 23 July 2019</b></p>	<p><b>THE CHANGING ECONOMIC WORLD</b></p> <ul style="list-style-type: none"> <li>- There are global variations in economic development and quality of life.</li> <li>- Various strategies exist for reducing the global development gap.</li> </ul>	<p>Before half term: Cost-benefit analysis coastal management question.</p> <p>After half term: Selection of questions based upon the field work or paper 3 data.</p>
